

The embodiments of the invention in which an exclusive property or privilege is claimed are defined as follows:

1. A single member low profile hanger, comprising:
 - a first planar section having an attachment structure, the first planar section being
5 configured to attach to a surface;
 - a second planar section, the second planar section being attached to the first
planar section by a first curved section; and,
 - a third planar section, the third planar section being attached to the second planar
section by a second curved section,
 - 10 wherein the second and third planar sections are offset from the first planar
section.
2. The hanger of Claim 1, wherein the attachment structure is at least one of a screw,
nail, pin, clip, magnet, adhesive, sliding coupler or combinations thereof.
3. The hanger of Claim 1, wherein the hanger material is at least one of a metal,
15 ceramic, plastic, combination or alloy thereof.
4. The hanger of Claim 3, wherein the metal is aluminum.
5. The hanger of Claim 1, wherein the surface is the underside of at least one of a table
or desk.
6. A low profile hanger, comprising:
 - a first planar section;
 - a second planar section, the second planar section being attached to the first
20 planar section by a first curved section; and,
 - a third planar section, the third planar section being attached to the second planar
section by a second curved section,
 - 25 a means for attaching the for attaching the first planar section to a surface,
wherein the second and third planar sections are offset from the first planar
section.
7. The hanger of Claim 6, wherein the means for attaching is at least one of a screw,
nail, pin, clip, magnet, adhesive, sliding coupler or combinations thereof.

8. The hanger of Claim 6, wherein the hanger material is at least one of a metal, ceramic, plastic, combination or alloy thereof.
9. The hanger of Claim 8, wherein the metal is aluminum.
10. The hanger of Claim 6, wherein the surface is the underside of at least one of a table or desk.
